# WHEN DEGREES MATTER.

## Providing Optimal Temperature Control & Protection Since 1958.

We've been doing this for a long time - and doing it well. We understand that your breeding product shipments must arrive undamaged and at the correct temperature. The vast sizing options for our double walled combo coolers hold from 2-300 doses so you can choose the solution that's right for you.

The following are our most commonly ordered cooler-in-a-cooler combinations designed for double-insulating swine semen shipments, but our experienced packaging experts will ensure the best and most economical system for you.

And because we care about the environment, we have a robust recycling program and all of our coolers can be made with our biodegradable and recyclable

# REfoam<sup>+</sup>

which is EPS created from 30% recycled content foam.

### LOW MLQ'S

Inside	Outside	Bags	Bottles/Tubes
TK6	TK20	35-40	25-30
TK7	TK20	40-45	30-35
TK8	PC30	45-50	35-40
SL610	SL922	70-80	55-65
SL10	SL22	110-125	80-100
LC8	PC75	150-180	130-140
PC850	PC80	250	200
PC1050	PC90	300	250
